---

## SUMMARY

Final-year Computer Science Engineering student with a strong foundation in Data Structures & Algorithms, Java, and Python. Proficient in HTML, CSS, JavaScript, and SQL, with growing hands-on experience in the MERN stack (MongoDB, Express.js, React.js, Node.js). Strong problem-solving mindset with a passion for building efficient, scalable software solutions.

---

## EXPERIENCE

**Competitive Programming & Advanced Algorithmic Techniques Intern—byteXL 20 May 2026 – 4 Jul 2026**

- Completed a structured internship focused on competitive programming and advanced algorithmic problem-solving techniques at Sri Venkateswara College of Engineering (SVCE), Tirupati.
- Strengthened skills in algorithm design, optimization, and efficient problem-solving through hands-on practice.

---

## EDUCATION

|                                                   |              |                   |              |
|---------------------------------------------------|--------------|-------------------|--------------|
| Sri Venkateswara College of Engineering, Tirupati | B.Tech (CSE) | CGPA:8.48/10.0    | 2023–Current |
| Narayana Junior College, Kurnool                  | Intermediate | Percentage: 95.8% | 2023         |
| Target High School, Tadipatri                     | SSC          | Percentage: 95.6% | 2021         |

---

## TECHNICAL SKILLS

- Programming Languages:** Java, Python | **Core:** Data Structures & Algorithms
- Web Technologies:** HTML, CSS, JavaScript
- Database:** MySQL
- Tools:** Git, GitHub, VS Code
- Soft Skills:** Problem-Solving, Team Collaboration, Technical Documentation

---

## PROJECTS

- Emergency Response Route System (Completed) | Java, Graphs, Dijkstra's Algorithm ([link](#))**  
**Technologies:** Java, Graph Data Structures, Dijkstra's Algorithm, Priority Queue, HashMap  
**Description:** Developed an interactive route optimization system that computes the shortest path between hospitals and accident locations using Dijkstra's Algorithm. Utilized Priority Queue and HashMap for efficient route calculation, implemented input validation for invalid and unreachable locations, and enabled real-time user input to simulate emergency response scenarios.
- UI Clone Projects – Front-End Practice (Completed) | HTML, CSS, JavaScript ([link](#))**  
**Technologies:** HTML, CSS, JavaScript  
**Description:** Built responsive front-end clones (Google landing page, Spotify web app, and a responsive sidebar navigation menu with dynamic show/hide, click-outside-to-close, and active-link highlighting functionality) to strengthen skills in layout design, responsiveness, and interactive UI development.

---

## COURSES, CERTIFICATIONS & ACHIEVEMENTS

- Internship Certificate – Competitive Programming & Advanced Algorithmic Techniques, byteXL [\(Certificate Link\)](#)
  - Data Structures & Algorithms with Java – Apna College [\(certificate link\)](#)
  - Python Programming Certificate – Scaler [\(certificate link\)](#)
- 

## OTHERS

- **Languages Known:** English, Hindi, Telugu
